

Multi Press Machine

singleSTATION - **UPPER**body

FEATURES

Our ProDual Multi Press Component features a sleek, structural tube frame with a durable, powder-coated finish that exhibits a modern, design-forward aesthetic. The Multi Press functions as a modular component on the ProDual 3-Stack and 4-Stack Gyms.

The ProDual Multi Press Component features impact-resistant fiberglass reinforced nylon pulleys, including precision ground and sealed bearings to ensure prolonged cable life and smooth movement. 11-gauge 6 x 12cm oval tubing on the main frame, combined with 3-gauge steel connecting plates and 1/2" diameter connecting bolts adds to the machine's strength and durability.

The spun steel aircraft cables of the ProDual Multi Press are 5.5mm in diameter and are rated to over 1135kg, providing smooth movement and a safe workout. Industrial-rated, sealed bearings at all major pivot points provide smooth movements and easy adjustments.

To ensure user comfort, the ProDual Multi Press features over 2" of DuraFirm upholstery, doublestitched, fully supported and guaranteed to be tear resistant. High-density rubber foam grips and handles add comfort to the ergonomically correct gripping surfaces, while multiple seat and cushion adjustments provide unlimited positioning for any sized user.

From flat bench to shoulder press, the ProDual Multi Press Component offers a biomechanically designed solution for people seeking maximum chest concentration and outstanding muscle development.

Works as a modular component on the Pro Dual 3 or 4 Stack DGYM

- Unique 20-position adjustable seat and back pad slide in unison, creating multiple press angles from flat through incline and vertical shoulder press.
- Heavy-duty counterbalanced press bar includes 5 adjustment angles and pillow block bearing pivots for continuously smooth movement.
- Multiple press handles provide users of all sizes with different grip angles to create variable exercises to concentrate on distinct areas of the chest and triceps.

TECHNICAL SPECIFICATIONS

Usage	Commercial
Dimensions (cm)	226L x 145W x 158H
Weight Stack	90kg
Optional	136kg weight stack
