

RECUMBENT BIKE

Finger Tip Resistance

On-your-finger-tips fast track control +/- to adjust the resistance switches and additional contact heart rates offers most convenient workout controls and data capturing.

Ergonomic Designed Seat

The seat is ergonomically designed with an integrated comfort groove. Wrap-around seat adjustment allows for easy seat changes or adjustments with just one hand. Step-through design allows easy entry and exit with a small 120mm step-over height

Oversized Cranks

Oversized cranks and extra wide, dual-sided pedals with easy adjustable straps offer durability and accommodation for all feet sizes. The crank and shroud cover designs offers an "easy to get to" for servicing and maintenance.

Q-Factor

The optimized Q factor (distance between pedals) reduces the force on the knees and makes each pedal stroke more efficient.

FRAME	2 Step powder-coating with rust resistant undercoat
RESISTANCE	20 Levels
BRAKE	Self powered hybrid brake
RESISTANCE BRAKE POWER	450W
CRANK	Oversized
PEDALS	Oversized dual-sided pedals with integrated straps
