

TLS-O ADJUSTABLE BOXING BAG STAND

ADJUSTABLE HEIGHT

FLEXIBLE REINFORCED SHAFT

The Orbit 'Big Punch' Adjustable Boxing Bag Stand is the Ideal Boxing/ MMA Training Partner to Increase your Fitness, Stamina, Coordination and Reflexes

The adjustable height bag of the 'Big Punch' Bag is designed to absorb the impact of blows and repeated physical contact without breaking, both safely and efficiently.

FLEXIBLE REINFORCED SHAFT

The shaft provides elasticity when punched or kicked and rebounds to the upright position after every hit. Reinforced by steel straps to ensure structural integrity through the toughest of training sessions.

ADJUSTABLE HEIGHT

Customise your resistance with ease. There are no limits to how easy or hard you make it. A couple of quick turns and you're riding up a hill. Need to stop quickly? Just press the emergency stop.

LOW PROFILE BASE

The high density, tough, durable base increases stability and absorption of the bag when hit. It can be filled with water or sand to prevent the bag from tipping over from heavy blows
